SUMMARY

Innovative MERN Stack Developer with a foundational experience in developing robust applications. Successfully enhanced a job portal's capability to handle 50% more user traffic through effective use of the MERN stack and implemented a WebSocket-driven real-time notification system, boosting user engagement by 35%. Aspiring to leverage these skills in developing dynamic web solutions, delivering high-quality user experiences.

EXPERIENCE

MERN Stack

GrowTech   **October 2024 – January 2025, Indore**

- Completed Java Training in 90 days.
- Where I worked on job portal project.
- Developed a job portal application using the MERN stack, enhancing platform capability to handle increased user traffic by 50%, integrating RESTful APIs for seamless data retrieval and storage.
- Spearheaded the implementation of a real-time notification system using WebSockets, improving user engagement by 35% and ensuring seamless interaction within the job portal platform.

PROJECT

Employee Management System

- The system will store and manage employee information, including IDs, contact details, email addresses, departments, and addresses.
- It will allow searching, deleting, inserting, updating, and loading employee data..

Doctor Appointment System

- This project uses Advanced Java concepts like JSP, JSTL, Servlet, HTML, CSS, Bootstrap 5, and MySQL.
- It facilitates doctor-patient interactions, appointment booking, and management..
